

I object to your proposal to give LPFM broadcasts priority over translator broadcasts. While I understand that your policies are that radio stations are designed to support local areas, the service of KLOVE of California has an extremely general benefit to everyone and shutting down their translators would end their being able to reach hundreds of thousands of people nationwide. KLOVE is a station that promotes family values and has "family-friendly" programming. As a resident of my community KLOVE provides the type of programming I need along with announcements of local events. Given the type of "trash" that is broadcast over most stations, the absence of KLOVE would be a great blow to the public interest. Please do not give the LPFM stations priority.

Respectfully,

John McWhorter
